

Niche Selection Scorecard

From **The OneVision Playbook** by Isaiah Wright · onevision asset vault Fill this in. Do not retype it out of the book.

Chapter 3 · Stage 1 — Lane

Score three verticals. Take the highest. If two are within five points, take the one where you already know somebody.

Score each row 1-5. Multiply by the weight. Total out of 70.

SCREEN	WEIGHT	VERTICAL A: -----	VERTICAL B: -----	VERTICAL C: -----
Owner is reachable directly	×3			
One extra job obviously covers your fee	×3			
Can afford you (job value)	×2			
Easy to build a list of 200	×2			
Visibly in pain / already advertising	×2			
Growing category	×1			
You can stand talking about it daily	×1			
Weighted total		/70	/70	/70

HOW TO SCORE THE TWO THAT MATTER MOST

Owner reachable directly (×3). 5 = the owner answers the phone. 3 = a small office, one gatekeeper. 1 = corporate, a marketing manager, a vendor list.

One extra job covers your fee (×3). Do the arithmetic:

- Average job value: \$__
- Their close rate on estimates: ____%
- **Value of one appointment = job value × close rate = \$__**

5 = one appointment is worth several times your monthly fee. 3 = roughly comparable. 1 = you'd need a spreadsheet to justify it — pick a different vertical.

THEN THE RADIUS

Draw 20-30 minutes of driving around where you live. Don't widen it when outreach gets slow; that hides the real problem.

Qualifying businesses inside the radius: __

Under 100, widen once. Over 500, your constraint is your daily number, not your market.

DECISION

I sell to __ **within minutes of** __.
