

Three-Tier Pricing Calculator

From **The OneVision Playbook** by Isaiah Wright · onevision asset vault Fill this in. Do not retype it out of the book.

Chapter 5 · Stage 2 — Offer

Price from what one closed job is worth to the client. Their arithmetic sets your ceiling.

STEP 1 — THEIR NUMBERS

Average job value	\$__
Close rate on estimates	____%
Value of one appointment	\$__
Gross margin on a job	____%
Margin per appointment	\$__

STEP 2 — YOUR FEE AGAINST THAT

If you deliver ____ appointments a month, you're putting \$__ of margin on their calendar.

Your monthly fee: \$__

Ratio: ____ : 1

If a business owner needs a spreadsheet rather than a moment's arithmetic to see this, one of the two numbers is wrong.

STEP 3 — SPLIT THE FEE

	SHAPE	WHY
Build — registration, account, automations, sequences	One-time setup: \$____	Value lands once. Paid before the work
Management — optimization, replies, reporting	Monthly: \$____	Value arrives continuously
Ad spend	Client's own card, direct to platform	Never run this through your account

STEP 4 — THREE TIERS

	STARTER	STANDARD	FULL
Setup (one-time)	\$_____	\$_____	\$_____
Monthly	\$_____	\$_____	\$_____
Channels	One	Two	Two + retargeting
Follow-up	Automated	Automated + manual	Automated + manual + call
Reporting	Monthly	Weekly	Weekly + call
Best for	Solo operator	2-5 crew	Multi-crew / multi-location

That last row does more work than the prices. Name the buyer, not the feature.

STEP 5 — THE SIGNALS YOU'RE TOO CHEAP

- [] Closing more than half the people who hear the price
- [] At capacity and can't take another client
- [] Never lost a deal on price

Any box ticked means you haven't found your ceiling yet.

STEP 6 — ANNUAL ADJUSTMENT

Put a stated annual adjustment of _____% in the agreement at signing. Far easier agreed once than raised later.
